

# ENVIRONMENTAL LEAD NEWSLETTER

May - June 2000

## UPDATES AND ANNOUNCEMENTS

### EPA accreditation of training courses:

Requirement for accreditation of training courses in states that have environmental lead programs ran by the Environmental Protection Agency has been in effect since March 1, 1999.

There are ten (10) EPA regions. Not all training courses are accredited by all regions. Therefore if you intend to work in those EPA states you need to make sure that the course is approved by that particular region.

Kentucky is located in Region IV. There are three (3) states in Region IV which the certification, accreditation and compliance programs are run by EPA. These are: Tennessee, South Carolina and Florida.

To the north of Kentucky the states are located in EPA Region V. All states are authorized to carryout their own programs, therefore you will have to contact each of those states for training and certification information. Also, some of these states may accept accredited courses taught in EPA run states and some may not. This will depend on their rules and any reciprocity issues.

If you have questions about approved training providers or certification in the three states that have programs run by EPA Region IV contact (404) 562-8956.

## HOUSING AND URBAN DEVELOPMENT (HUD) RULES and STATE RULES

The effective date of the new Housing and Urban Development (HUD) is September 15, 2000. HUD has indicated that they issued the regulation to protect young children from lead-based paint hazards **in housing financially assisted by the Federal government or sold by the federal government**. The regulation will control lead-based paint hazards in such housing, and applies to housing that was built before 1978, when lead-based paint was banned nationwide for consumer use. This rule can be obtained from the Internet at [www.hud.gov/lea](http://www.hud.gov/lea) or by contacting the National Lead Information Center at 1-800-424-LEAD.

Most of the requirements and conditions identified in this HUD regulation are not covered under Kentucky regulations, which relate to requirements for lead-hazard assessment and/or abatement of lead hazards. Some general requirements are the same as under Kentucky "Environmental Lead" regulations and federal EPA rules, such as the list of prohibited practices, definition of deteriorated paint, etc. The requirement for the use of certified inspectors and risk assessors to assess lead hazards in residential dwellings are the same.

However, there are some significant differences. They are:

- The new HUD rule will require "clearance" after lead-hazard control activities. This would include interim control, as well as renovation and remodeling activities.
- Under Kentucky regulations "clearance" is required after lead-hazard abatement activities are completed.
- Under Kentucky regulations "dust clearance" would be considered as a lead hazard assessment.
- HUD is proposing that a "clearance technician" be used to conduct dust wipe clearance.
- Kentucky regulations do not allow for the use of a "clearance technician."
- The HUD rule requires inspections and risk assessments to be conducted, depending on several factors such as the age of the property, the type and amount of federal assistance etc.

-continued on page 2 -

## INSIDE THIS ISSUE

### Editor:

Terry M. Wescott, Health Program Administrator  
Environmental Lead Program  
Division of Public Health Protection and Safety  
Department for Public Health  
275 East Main Street  
Frankfort, Kentucky 40621 (502) 564-4537

## Updates and Announcements –continued- Loss of Certification

The following individuals or companies have been removed from the listing of certified individuals since they have not renewed their certification.

### **Supervisors:**

Lester Hambrick 42-012

### **Risk Assessors:**

Timothy Edlin 41-034

### **Companies:**

Keen and Cross 45-008

### **The following individuals or companies will expire in the next three (3) months:**

#### **Lead Inspector:**

Todd W. Curtis 09-21-00

#### **Risk Assessors:**

##### **Supervisors**

David Peveler 08-20-00

John Lambert 09-22-00

Donald Morris 09-22-00

##### **Workers**

James Blake 08-20-00

Kenneth Clark 08-20-00

##### **Companies**

Aegis Env., Inc. 08/21/00

Thomas Env. Services 09/22/00

## **Inspectors/Risk Assessors**

### **Composite Dust Wipe Samples**

As discussed in a past newsletter EPA's program to recognize laboratories for proficiency in lead testing for paint, dust, and soil samples, under the National Lead Laboratory Accreditation Program (NLLAP) does not contain components for composite dust wipe samples.

EPA indicates that they are committed to resolving this problem, and have prepared a bulletin (EPA 747-F-00-004) for lead professionals to use until the issues are resolved.

We are including a copy of this bulletin for the certified inspectors/risk assessors and accredited training providers.

Others who wish to have a copy of this information can contact this agency or can find this document on the EPA Web page [www.epa.gov/lead](http://www.epa.gov/lead) under the subheading "Technical Reports and Scientific Studies on lead".

## **HUD Rules –cont-**

- Kentucky regulations do not require inspections or assessments be conducted. However, when they are performed they must be conducted by certified individuals, use standards and procedures, etc.

Other information concerning the differences between state and HUD rules concerning the use of a "Certified Supervisor" will be discussed in the next newsletter.

## **"THE LEAD LISTING"**

The lead listing is a service that lists at no cost companies and/or individuals who provide lead evaluation services, lead hazard control services, and/or sample analysis for lead. The listing can be reviewed on the Internet at [www.leadlisting.org](http://www.leadlisting.org) or can be accessed via the phone at 1-888-532-3547.

This listing is operated by QuanTech, Inc., under contract with to the HUD Office of Lead Hazard Control. Companies or individuals who qualify can be listed on the lead listing. For specific qualifications and the requirements for specific information that needs to be provided contact the Lead Listing, c/o Quan Tech, 1815 Fort Myer Drive, Suite 908, Arlington, Va. 22209-1817 or call 703-312-7838.

HUD often refers to this listing as the source for certified companies or individuals.

**Note that this is one source of information. However, the listing may not be complete or up-to-date.** Not all companies or individuals have chosen to be listed there, and may not be updated according to the current certification status with a state or EPA.

As a supplement to this source, each EPA authorized state should be able to provide an updated listing of certified companies and individuals, and EPA can provide the listing in unauthorized states.

## Certification Listing

### Lead-Hazard Risk Assessors

George D. Adams Exp. 10/1/01  
9305 Bova Court  
Louisville KY 40291-1486

Ted M. Audus Exp. 10/29/00  
Analytical Industries, Inc.  
Paducah, KY. 42003  
(502) 527-5495

Gerald H. Beaudion Exp. 3/26/01  
The Payne Firm, Inc.  
Cincinnati, OH 45242  
(513) 489-2555

Todd S. Biter Exp. 3/2/01  
Resolution, Inc.  
Nashville, TN. 37207  
(615) 865-8813

Brian Bottom Exp. 11/5/02  
University of Kentucky  
Lexington, KY. 40506  
(606) 257-3285

Kevin Chaplin Exp. 02/18/01  
Environmental Mgmt. Consultants, Inc.  
Lexington KY 40507

### Training Provider Issues

#### Third Party Examinations

As a certification requirement identified in 902 KAR 47:080, most of the disciplines require taking a 3<sup>rd</sup> party examination. The 3<sup>rd</sup> party examination that is given is the EPA model. Presently that examination is being offered at Kentucky TECH and college sites. There have been some problems associated with these locations due to changes in personnel, etc. "New EPA" examinations have been written and in the near future they will be given by the agency. Additional information will be provided to you at a later date as to the availability and locations of the testing facilities.

#### Review Your Student Needs (potential work locations)

Since 1998 several states have become authorized by EPA to conduct their own programs certification and compliance programs. In addition EPA has programs in effect in some states. Individuals who are seeking certification are often confused as to their needs. It is important that the training providers should be clear as to which states will accept their training for certification. To promote your course as preparing the individual to become certified in particular state may be a violation of EPA rules and some state laws. In fact some rules indicate that you cannot offer to provide the training without being accredited.

#### EPA Model Courses

The Worker Course and the Supervisor Courses can now be obtained from the National Technical Information Services at 5285 Port Royal Road, Springfield, Virginia 22161, phone number (703) 605-6000. For those training providers who have stated that they are using the EPA model training curriculums must obtain these course materials. Those training providers who are using a modified EPA curriculum or have their own course materials should also purchase these materials and adjust their course materials accordingly.
